Minimise the risk of fire on our access balconies

An access balcony is particularly vulnerable to fire small leaves quickly accumulate and can be ignited. Poorly extinguished cigarette butts can also cause a fire. Therefore, always put cigarette butts in a sealable jar, containing water.

Remember to keep the access balconies free from combustible material.

If you would like to have a small café set outside your door, it is permitted if seat cushions and the like are removed when not in use. Place furniture and flowerpots as close to the exterior wall as possible. A clear passage at least one metre wide from the railing facilitates evacuation. Do not store anything alongside the railing.

Do not leave prams on the access balcony. Barbecuing with charcoal or bottled gas is not permitted on the access balcony. An electric grill may be used.

Thank you for helping to keep our access balconies safe!

With kind regards,
Area Managers
